**TWO-DAY LIVE TRAINING IN COGNITIVE REHABILITATION**

Learn **ALL** the Evidence-Based Strategies to Deliver the **RIGHT** Treatment

Professionals who treat brain injury may now learn all of the evidence-based cognitive rehabilitation strategies recommended in scientific literature in one course. Based on the ACRM *Cognitive Rehabilitation Manual: Translating Evidence-Based Recommendations into Practice*, this two-day, introductory training helps occupational therapists, speech-language professionals, psychologists, physicians, physical therapists and others choose the best interventions with confidence.

**Cognitive Rehabilitation Training**

**2016 TOUR:**

**6 – 7 FEB 2016 // ATLANTA, GA**

Shepherd Center / 2020 Peachtree Rd NW, Atlanta, GA

**27 — 28 FEB 2016 // LINCOLN, NE**

Bryan Medical Center / 2300 South 16th St, Lincoln, NE

**13 – 14 APR 2016 // CHICAGO, IL**

Chicago Hilton / 720 South Michigan Ave, Chicago, IL  
*Preceding the ACRM Mid-Year Meeting*

**19 – 20 MAY 2016 // SWEDEN**

University of Gothenburg

Konferenscentrum Wallenberg, Medicinaregatan 20 A Gothenburg, Sweden

**4 – 5 JUN 2016 // LOUISVILLE, KY**

Jewish Hospital, Rudd Heart and Lung Conference Center  
201 Abraham Flexner Way / Louisville, KY

**31 OCT – 1 NOV 2016 // CHICAGO, IL**

Chicago Hilton / 720 South Michigan Ave, Chicago, IL

*Preceding the ACRM Annual Conference: Progress in Rehabilitation Research (PIRR)*

**Registration Includes:**

- Two days of training led by authors of the manual

- 12 hours of continuing education in choice of 10 disciplines
- **One printed copy of the ACRM Cognitive Rehabilitation Manual (\$150 Value)**
- 6 months access to a previously recorded Cognitive Rehabilitation Training (\$395 value)
- Non-member registration includes an ACRM 6-month introductory membership, including access to all interdisciplinary special interest groups and networking groups.

The training encompasses all evidence-based strategies recommended in the scientific literature and operationalizes them into step-by-step guidelines for immediate use in clinical practice. Never before have research outcomes been so accessible. Course content is designed to enable participants to confidently choose proven interventions for impairments of executive functions, memory, attention, hemispatial neglect, and social communication. Instruction is supported by case examples.

**"Leaders of the interdisciplinary team taking care of people with cognitive dysfunction need to know these strategies in order to give consistent care,"** says Tamara Bushnik, PhD, FACRM, Rusk Rehabilitation at NYU Langone Medical Center.
