TWO-DAY LIVE TRAINING IN COGNITIVE REHABILITATION

Learn **ALL** Evidence-Based Strategies to Deliver the **RIGHT** Treatment

Occupational therapists, speech-language pathologists, neuropsychologists and others who treat individuals with brain injury may now learn *ALL* of the evidence-based cognitive rehabilitation strategies recommended in scientific literature in one two-day training course based on the ACRM *Cognitive Rehabilitation Manual: Translating Evidence-Based Recommendations into Practice*.

Cognitive Rehabilitation Training TWO LIVE TRAINING COURSES:

April 8 – 9, 2015 // Indianapolis, IN, USA: IU Neuroscience Center, Hosted by Rehabilitation Hospital of Indiana. This course precedes the ACRM Mid-Year Meeting.

October 26 – 27, 2015 // Dallas, TX, USA: Hilton Anatole in Dallas, TX, USA. This course is held in conjunction with the 92nd Annual ACRM Conference, *Progress in Rehabilitation Research*.

The training encompasses all evidence-based strategies recommended in the scientific literature and operationalizes them into step-by-step guidelines for immediate use in clinical practice. Course content is designed to enable participants to confidently choose proven interventions for effective treatment of various cognition impairments.

Never before have research outcomes been so accessible for use in everyday clinical practice. Based on the ACRM *Cognitive Rehabilitation Manual: Translating Evidence-Based Recommendations into Practice*, this live introductory training operationalizes scientific recommendations into standards and step-by-step procedures that may confidently be used by rehabilitation professionals.

"Leaders of the interdisciplinary team taking care of people with cognitive dysfunction need to know these strategies in order to give consistent care," says Tamara Bushnik, PhD, FACRM, Rusk Rehabilitation at NYU Langone Medical Center.

ACRM is proud to offer this unique training led by a team of authors and contributors to the Manual. In order to identify the right treatment, providers must know all of the recommended strategies. This training teaches all recommended evidence-based interventions for impairments of executive functions, memory, attention, hemispatial neglect, and social communication and supports instruction with case examples. This training is an opportunity to learn from leading researchers and clinicians in the field.

More information and to register, visit: www.ACRM.org/cog

Course includes a printed copy of the Manual (\$150 value) and includes clinical forms and worksheets

92nd ACRM Annual Conference: 12 – 16 November 2013
DALLAS, TX, USA / Hilton Anatole

**Come for Cognitive Rehabilitation Training and
Stay for the Largest Interdisciplinary Rehabilitation Research Conference in the World**

**92nd Annual ACRM Conference, *Progress in Rehabilitation Research (PIRR)*
October 26 – 27, 2015**

At PIRR 2015, attendees can dive into NON-STOP content for brain injury, stroke, spinal cord injury, neurodegenerative disease, pain and cancer. Earn Continuing Education credits in your choice of **14** disciplines. There is no better place to grow your professional network, learn and share with your peers, and nurture the kind of lifelong friendships that support your passion for IMPROVING LIVES.

MORE: <http://ACRMconference.org/>

ACRM is the leading association for interdisciplinary rehabilitation research and publishes the most cited scientific journal in rehabilitation, *Archives of Physical Medicine & Rehabilitation*. The ACRM Annual Conference, *Progress in Rehabilitation Research (PIRR)*, is a platform for outstanding education and exchange between researchers and providers: 25 – 30 October 2015 // Dallas, TX, USA www.ACRM.org.
