ACRM OFFERS TWO-DAY LIVE TRAINING IN COGNITIVE REHABILITATION
Learn **All** Evidence-Based Strategies to Deliver the **Right** Treatment

The American Congress of Rehabilitation Medicine (ACRM) and the Johns Hopkins Department of Physical Medicine and Rehabilitation together will sponsor a live two-day training for rehabilitation professionals based on the Cognitive Rehabilitation Manual: Translating Evidence-Based Recommendations into Practice. The training encompasses all of the evidence-based strategies recommended in the scientific literature and operationalizes them into step-by-step guidelines for immediate use in clinical practice. Course content is appropriate for occupational therapists, speech-language pathologists, neuropsychologists and other rehabilitation providers and is designed to enable participants to confidently choose proven interventions for effective treatment of various impairments of cognition. Training will be held April 24 – 25, 2013 at the Hilton Baltimore in Baltimore, MD. Advance registration rates are available at www.ACRM.org/COG.

BALTIMORE, Maryland – Occupational therapists, speech-language pathologists, neuropsychologists and others who treat individuals with brain injury may now learn *all* of the evidence-based cognitive rehabilitation strategies recommended in scientific literature in one two-day training.

Never before have research outcomes been so accessible for use in everyday clinical practice. Based on the *Cognitive Rehabilitation Manual: Translating Evidence-Based Recommendations into Practice*, this live introductory training operationalizes scientific recommendations into standards and step-by-step procedures that may confidently be used by rehabilitation professionals.

The American Congress of Rehabilitation Medicine (ACRM) is proud to offer this unique training led by a team of original authors and contributors to the Manual. In order to identify the right treatment, providers must know all of the recommended strategies. This training teaches all recommended evidence-based interventions for impairments of executive functions, memory, attention, hemispatial neglect, and social communication and supports instruction with case examples. This is an outstanding opportunity to learn from leading researchers and clinicians in the field.

WANT TO GO?

The lowest advance registration pricing is valid through February 15, 2013. [Register Today!](http://www.ACRM.org) < <https://netforum.avectra.com/eWeb/DynamicPage.aspx?Site=ACRM&WebCode=LoginRequired> >

Cognitive Rehabilitation Training: 24 – 25 April 2013
ACRM Mid-Year Meeting: 26 – 27 April 2013
Hilton Baltimore, Baltimore, Maryland

SPONSORED BY:

Johns Hopkins Department of Physical Medicine and Rehabilitation

REGISTRATION INCLUDES:

- A printed copy of the Manual — all 150 pages, including clinical forms – a \$150 value.
- Six months of free access to the ACRM LIVE Learning Center where you may review a previously recorded two-day training synchronized with the original presentation slides.
- Continuing Education credit – Approximately 12 contact hours.
- Boxed lunch and refreshments
- BONUS 1-hour session about collecting payment from insurance companies for treatment provided.
- Nonmembers receive FREE 6-month Introductory Membership to ACRM

BONUS: STAY FOR THE ACRM MID-YEAR MEETING

Put your introductory ACRM membership to work right away by staying in Baltimore for the ACRM Mid-Year Meeting. Immediately following the training, this meeting is FREE to ACRM members and is a time for face-to-face interaction with task force members to move important projects forward, networking across disciplines, meeting members of the ACRM board of governors, and catching up with old friends in a relaxed and intimate setting. “This is where the *real* work happens,” says ACRM President Tamara Bushnik, PhD, “and you get to meet and work with the leaders in the field.”

All eight of the Brain Injury Interdisciplinary Special Interest Group (BI-ISIG) task forces will be there and invite you to join them:

- Cognitive Rehabilitation Task Force
- Community-Based Treatment Task Force
- Disorders of Consciousness Task Force
- Girls & Women with TBI Task Force
- Long-Term Issues Task Force
- Mild TBI Task Force
- Pediatric and Adolescent TBI Task Force
- Prognosis after TBI Task Force

The International Networking Group (ING), and the Spinal Cord Injury Interdisciplinary Special Interest Group (SCI-ISIG) will also be there.
