Everyone Welcome!

JUST LIKE EVERY YEAR, everyone is welcome at ACRM — all rehabilitation professionals, administrators, researchers, clinicians, consumers, family members, and caregivers.

NEW THIS YEAR, there are TWO ways to register and attend: VIRTUAL-ONLY or IN-PERSON. Either way you can rest assured knowing the TOGGLE OPTION allows you to lock-in the rate at time of purchase, and you're allowed to switch after your purchase and before the event without penalty.

Through thick and thin, since 1923, ACRM has been serving as the professional home for physical medicine and rehabilitation professionals and for those who LOVE the research. ACRM is THE PLACE where researchers, clinicians, and the whole rehab team — meet and work together to bring the evidence-based science into practice. Faster. To IMPROVE LIVES and livelihoods.

Register NOW to lock-in your Early Bird savings < 10 < Even if you switch passes later!

Early Bird rates fly the coup soon

mHealth Applications in Neurorehabilitation: Interactaion of Neuroplasticity, Technology and Clinical Practice ACRM.org/ICC SPECIAL SYMPOSIUM ANCHOR: mRehab: New Models of Care Using

Information and Communication Technology to Support Rehabilitation in the PRESENTER: Mike Jones, PhD, FACRM, Vice President of Research and Technology, Shepherd Center, Atlanta, Georgia. TEC, CC ACRM.org/77223

edge, engaging, and quickly-delivered condensed presentations.

Powerful and thought-provoking, RED TALKS cut straight to the

Mobile information and communication technologies (ICT) are reaching the maturity needed to support robust, remote mobile healthcare. As "digital health" catches on it is assisting in managing the provision of care throughout the health ecosystem, supporting the shift to value-based care. This presentation will introduce the newly-funded Rehabilitation Engineering Research Center on ICT Access for Mobile Rehabilitation. The RERC is a collaboration between Shepherd Center, Duke University, UC-Irvine, Moss Rehabilitation Research Institute, and commercial partners PtPal and FlintRehab. Its mission is to advance mRehab, developing and demonstrating the value of innovative ICT applications for rehabilitation in the home

and community. THURSDAY 22 OCTOBER Post-Acute and Community Rehabilitation: Present & Future Practice/ **Needs** ACRM.org/ICC2

Where We Are and Where We Could Go Next PRESENTERS: Christina Papadimitriou, PhD, Associate Professor, Oakland University; and Nicola Kayes, PhD, MSc (Hons), BSc, Professor of Rehabilitation and Director, Centre for Person Centred Research, Auckland University of Technology) CC, INT ACRM.org/773674

SPECIAL SYMPOSIUM ANCHOR: Person-Centered Rehabilitation and Beyond:

Person Centered (PC) rehabilitation is integral to quality rehabilitation care. There are multiple models of care that attempt to frame this ubiquitous concept in an effort to implement it into practice. The overall goal of this symposium is to dialogue about this important topic rather than decide on a single model for PC care. We will offer critical appraisals of historical, cultural, and evidence-based information about this important trend in order to rethink rehabilitation anew.

FRIDAY 23 OCTOBER Lifestyle Approaches to Achieve Long Term Health in Rehabilitation **Populations** ACRM.org/ICC3

SPECIAL SYMPOSIUM ANCHOR: Promoting Real World Physical Activity to Improve Health Outcomes in Persons Living with Multiple Sclerosis PRESENTERS: Victor Mark, Erwin van Wegen, Mark Hirsch, Ekaterina Dobryakova, Michele York ND, LM, TEC ACRM.org/772092

Victor Mark, MD, of the University of Alabama at Birmingham, and Movement Scientist Erwin van Wegen, PhD of Amsterdam University Medical Center, Department of Rehabilitation Medicine, The Netherlands, will present a SPECIAL SYMPOSIUM with a focus on ongoing and recently completed trials on rehabilitation to improve fatigue, physical activity and real world activities of daily living among people living with Multiple Sclerosis (PwMS). The presenters aim to provide rehabilitation clinicians and scientists evidence-based insight into the relationship between real world physical activity patterns and coping with fatigue among PwMS.
