ACRM is home to two scientific journals

“Archives is the oldest and largest rehabilitation journal in the world” —Leighton Chan, MD, MPH, FACRM, Co-Editor-in-Chief, Archives of Physical Medicine & Rehabilitation

Archives of Physical Medicine & Rehabilitation (The ARCHIVES) is the acclaimed international journal of ACRM covering the specialty of physical medicine and rehabilitation and allied disciplines.

Original articles report important trends and deliver authoritative information on the therapeutic utilization of physical behavioral and pharmaceutical agents in providing comprehensive care for individuals with chronic illness and disabilities.

According to the Journal Citation Reports, the 2022 Impact Factor for Archives is 4.3. The Archives ranks 11th out of 68 journals in the Rehabilitation category. It also has the second highest Impact Factor of all general Rehabilitation journals that are not discipline- or condition-specific and is one of only two journals in the top ten that publish over 200 papers per year.

With more than 35,000 lifetime citations, the ARCHIVES is by far the most cited journal in Rehabilitation.

The ARCHIVES is #2 in Google Scholar Metrics in the field of Rehabilitation Therapy.

MORE about the ARCHIVES: ACRM.org/archives
 Archives of Rehabilitation Research & Clinical Translation (ARRCT), an open access journal serving the rehabilitation community with the goal of advancing the health of persons with chronic diseases and disability.

ARRCT is indexed in PubMed Central, Scopus, the Directory of Open Access Journals (DOAJ) and Web of Science. It will receive its first Impact Factor in June 2024.

More than 90% of readers agree — The Archives publishes articles written by respected authorities who are relevant to patient care and critical to the field of PM&R*.

ACRM INSTITUTIONAL SUPPORT PROGRAM
OVERVIEW
ACRM offers the opportunity to send your message in an Email Blast to the exclusive ACRM database.

ACRM will send your message through the ACRM email service provider using your HTML code. If HTML is not easily accessible, vendors can provide content via a word document that includes all desired text, images, and links.

ACRM will provide a maximum of 6 email sends which includes the initial send, two follow-up notices, a break from the promoted content, the next resend, with two additional follow-up notices.

HOW THIS WORKS

**STEP 1)** Vendor identifies the target audience using the ACRM survey form (geography, diagnostic, and/or disciplines)

**STEP 2)** Vendor identifies the desired Open Rate

**STEP 3)** Vendor provides ACRM with an HTML code (preferred method) or word document

**STEP 4)** ACRM designs the email using provided HTML (preferred method) or word document and then ACRM will send the client a test sample for review / approval

**STEP 5)** Once the client test sample is approved, ACRM and Vendor will develop a distribution plan for the date and timing of emails to be sent based on ACRM availability.

Sponsorship Events Example:

Sponsored Presentations

Include up to three sponsor logos for each presentation!

**Format:** Logos submitted by exhibitors

**Quick Tips:**
1. Manage the sponsor logos in your Education Harvester
2. Since the logos display on a wide white area of the screen, avoid vertical graphics. Horizontal logos work best in the space where they are displayed.
Main Screen Tile Examples:

**1/4 Width Ad**

*Size:* 600 pixels wide x 400 pixels high  
*Format:* .jpg or .png

**Quick Tips:**
1. We suggest utilizing 1/4 width ads primarily for logos or icons, because you aren’t working with a ton of space!
2. Make sure to take note of the bleed area. Edges will be cropped when the graphic is resized for smaller devices like a phone.

---

**1/3 Width Ad**

*Size:* 800 pixels wide x 400 pixels high  
*Format:* .jpg or .png

**Quick Tip:**
1. Make sure to take note of the bleed area. Edges will be cropped when the graphic is resized for smaller devices like a phone.
1/2 Width Ad (Tall)
Size: 1,200 pixels wide x 800 pixels high
Format: .jpg or .png

Quick Tip:
1. Make sure to take note of the bleed area. Edges will be cropped when the graphic is resized for smaller devices like a phone.

1/2 Width Ad (Long)
Size: 1,200 pixels wide x 400 pixels high
Format: .jpg or .png

Quick Tip:
1. Make sure to take note of the bleed area. Edges will be cropped when the graphic is resized for smaller devices like a phone.
Main Screen Tiles

**Full Width Ad**

**Size:** Flexible Dimensions  
**Format:** .jpg or .png

**Quick Tips:**
1. We recommend using 2,000 pixels wide x 800 pixels high for a tall graphic, and 2,000 pixels wide x 400 pixels high for a long graphic.
2. You can make this ad as tall as you want. The ad will display as tall or short as it is designed. It will scale to fit the available width, so no need to worry about the safe and bleed areas!

*Example of 2,000 pixels wide x 800 pixels high ad

*Example of 2,000 pixels wide x 400 pixels wide ad
Show Unique Banners In Different Sections of Your App

Sub-page Banners are randomly rotating ads displayed on a specific page of the app, which can be linked to URLs. They only show in the following user specified areas: Expo, More Info, People, Posters, Presentations, and Search.

Quick Tips:
1. These banners are an effective way to call attention to particular parts of your event.
2. Each banner has 4 versions in order to support portrait and landscape orientation on both phones and tablets.
3. You can have different banners for different sections of the app (e.g. Schedule, Posters, Expo, etc.)
4. You can have multiple banners that change each time a user enters a page like the Expo Hub page.
5. This option will replace your event banner in the specified location.

**Sticky Banner**

The sticky banner only displays on the main screen and attaches to the edge of the menu on the bottom of the screen. It is always visible and remains stationary while scrolling on the main screen.

**Quick Tips:**

1. Standard apps can have one sticky banner that links to a website.
2. Pro apps can have rotating sticky banners that can change either daily or each time the main screen is shown.
3. Pro apps can have sticky banners that link to content inside the app, like a booth profile, speaker profile, or a presentation.

ACRM INSTITUTIONAL SUPPORT PROGRAM
OVERVIEW
The ACRM Annual Conference Online Program is the hub of the entire IN-PERSON program — where the educational content and event activities are searchable by keyword, session type, topic/focus area, presenter name and more filters.

The entire Online Program — the home page and the sub-pages — are open and FREE to the world, while the actual presentation content is available only for paid attendees. To search for presentations, exhibitors, speakers, community meetings, special events and more you must access the Online Program.

BENEFITS
• Advertising in the ACRM Annual Conference Online Program:
  o solidifies your place in the field of PM&R and among key opinion leaders and experts in the field of rehabilitation research and the translation to clinical practice.
  o allows you to reach the global rehabilitation community — while they are actively looking for relevant information.
• LONGEVITY — The Online Program receives meaningful traffic leading up to, during, and after the conference is over through the remainder of the year.
  o Attendees are encouraged to engage with the content and continue to earn CME/CEUs.

HOW THIS WORKS
  o Ads are sold for the duration of the event.
  o The sooner you purchase and place your ad, the more impressions and click-throughs.
The best traffic is the **WEEK of the Conference** and the four weeks leading up to the event.

- For maximum views & exposure, purchase your ad spot early.
  - We recommend before the beginning of summer.
  - Sooner is even better for your campaign.
- Slider positions automatically rotate after 5-8 seconds

COURSE DESCRIPTION

Children with brain injury are not simply “little adults” with brain injury. Their clinical presentation, and the evidence-based methods to help them, are inextricably intertwined with brain development, and the need to understand how to help the educational system support them in their development and transition to adult life. This course is designed for all brain injury rehabilitation professionals and school professionals working with children age 0-25 who have acquired brain injury. Training will include evidence-based interventions for cognitive rehabilitation needed by clinicians/educators in order to provide
optimum support for children, adolescents, and young adults who have sustained either traumatic or non-traumatic brain injury.

ACRM’s Pediatric Cognitive Rehabilitation Training Course provides such an opportunity by presenting evidence-based standards and guidelines for clinical practice and translating them into step-by-step procedures for use by clinicians. The interventions described can be readily used by occupational therapists, speech and language therapists, psychologists, and other rehabilitation and school professionals. The course includes practical guidelines on working with families and school systems.

LEARNING OBJECTIVES

To support the attainment of knowledge, competence, and performance, the learner should be able to achieve the following objectives:

1. Explain the interaction between age at injury and developmental stages of brain development
2. Describe techniques for improving attention and the steps involved in carrying out interventions for external memory strategies in children with brain injury
3. Describe common evidence-based visual and motor interventions used in children with brain injury
4. Describe specific strategies for structuring interventions for awareness, executive functioning, and behavioral/emotional self-regulation
5. Discuss a framework for interacting with schools and families to develop interventions to improve student’s ability to learn, be successful in school, and transition to adult roles

STATEMENT OF NEED AND TARGET AUDIENCE

Educational opportunities that promote evidence-based interventions for pediatric cognitive rehabilitation are needed by clinicians in order to provide optimum care for individuals with brain injury.

ACRM Pediatric Cognitive Rehabilitation Training provides such an opportunity by presenting evidence-based standards and guidelines for clinical practice and translating them into step-by-step procedures for use by clinicians.
